Command Viewer Data Entry Module

Centralized Training
Dallas, TX
12-16 January 2004

Instructors:
Doug Macherey, ISR Infrastructure Team (703 377-0508)
Hank Procter , ISR Infrastructure Team (703 377-0501)

As of 1330 5 Jan 2004

Infrastructure Data Entry Module

- The Infrastructure POC uses the data entry module of the Command Viewer for the following purposes:
  - Import installation-specific baseline data
  - Print ratings worksheets for all facilities to be rated
  - Enter facility ratings from completed worksheets
  - Compare current-year to prior-year facility ratings
  - Enter Commander’s Overwrites and General comments
  - See cost and asset data
  - Produce reports

Infrastructure Data Entry Module

- Therefore, it is the focus of much (but not ALL) of the Infrastructure POC's activity during the data collection cycle
- While the web-based data entry module is new for 2004, the 'look & feel' of the user interface is much the same as with the prior, PC-based ISR1:
  - Navigation window
  - Display of facility asset data
  - General and Overwrite comment entry
  - Display of cost data
  - Printing of rating worksheets

Infrastructure Baseline Data File

- What is it?
  - It contains **facility and requirements** data for your installation
- Where do you get it?
  - Initial file is toploaded in the Command Viewer
  - Updated files are requested through your Installation RPLANS Administrator
    - File sent to ISR server
    - Topload must be ‘scheduled’

Use Sampling* | Calculate

* Run Sampling Routine when Facility Ratings are changed within Sampled FCGs.

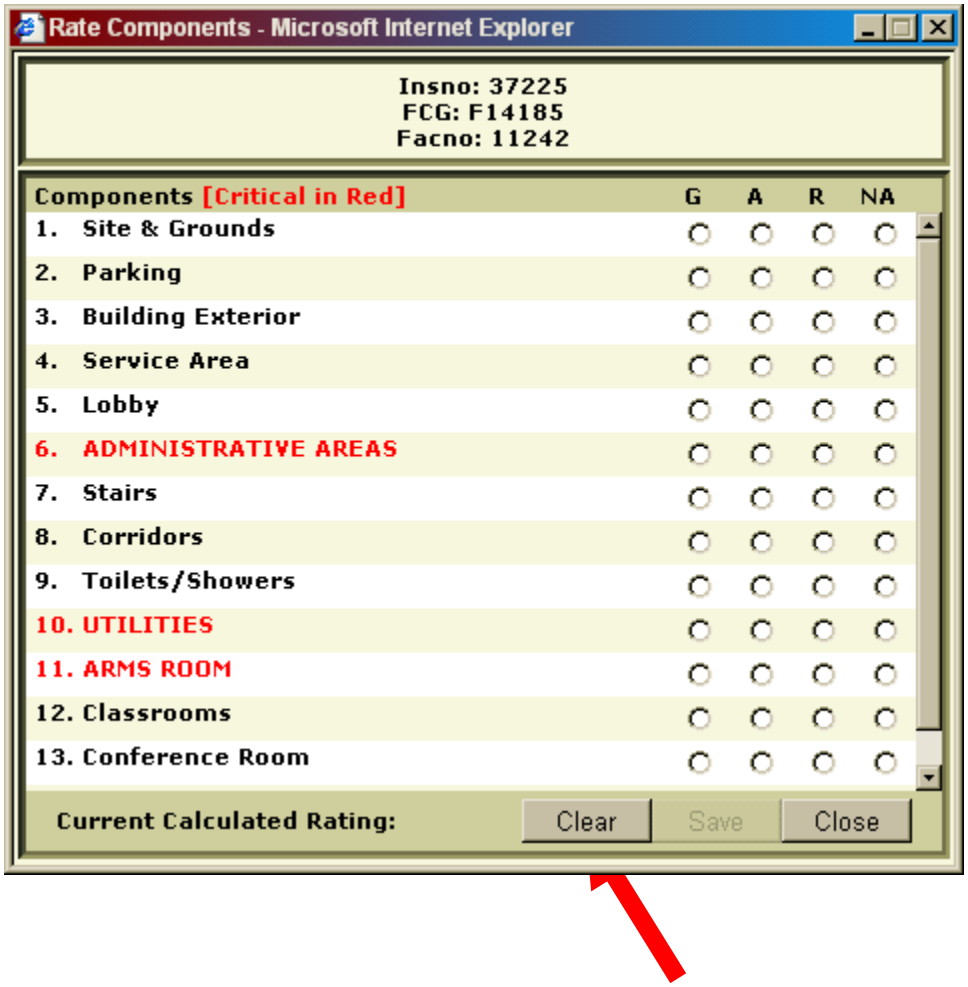
After entering component ratings, entries may be by clicking on the ‘Clear’ button



Questions On Entering Ratings?

Using Sampling For Facility Ratings

Using Sampling

- Use of sampling is optional
- It permits rating only a sample of facilities of a given type
- Must have a minimum of 50 of that facility type
- Typically done for Family Housing, playgrounds, unit ops buildings, etc.
- Benefit: saves time in completing rating that type of facility

Questions on Sampling?

Overwrite & General Comments

- Overwrite and General comments may be entered at both the Facility Class and Category levels
- Commanders may select an Overwrite rating at Facility Class or Category level if they feel that the ISR-calculated rating does not accurately reflect local circumstance
- Any Category-level C-3 or C-4 rating requires Commander’s comment (see Infrastructure Implementing Instructions) in the General Comment section

Updating RPLANS Data

Updating Baseline Data

- Your baseline data for ISR Infrastructure might need to be updated during the data collection cycle:
  - IFS data changed
    - New facilities
    - Facilities disposed
    - Correction of UM data
    - Correction of Ownership/Disposition Code
  - Requirements changed – requires Region approval
- Updated data file may be requested from your Installation RPLANS Administrator
- The updated data will be reflected in ISR Infrastructure once the new file has been toploaded

Validating Facility Ratings

Validating Ratings

- Before data is transferred from the data entry module to the Command Viewer, the data must be ‘validated’
- The purpose of the validation process is to check for critical errors
- Critical errors can include:
  - Not all facilities were rated
  - Category-level C-3/C-4 ratings with no Commander’s general comment
  - Overwrites without narrative justification
